

# Fire Permits – Buildings with Fire Suppression

## Notes:

1. Three (3) sets of drawings required.
2. Responsible Managing Employee (RME) will need to be on-site for underground hydro inspection, hydro inspection, and final inspection.
3. In three (3) sets of permits, include all cut sheets of storage tanks, how they are installed, piping, and a site plan with locations of lot lines. After permits and drawings are submitted, pressure tests and cover inspections will take place before final inspection.
4. Review takes approximately 7-10 business days.
5. Contractors must be licensed through the Texas Fire Marshal's Office.
